

# Who is best adapted?

Animals are well adapted for the habitat they live in. They possess certain attributes which allow them to survive and thrive in some of the harshest of environments.

Rank the following animals at Welsh Mountain Zoo based on their adaptations.

**1 - Best adapted to their habitat**

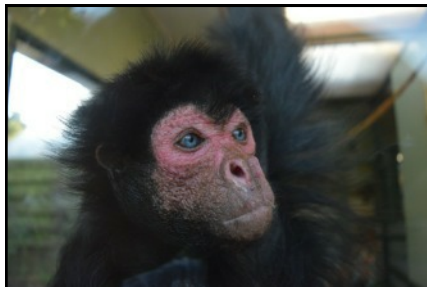

**4 - Least adapted to their habitat**

There is no right or wrong answer, but you must justify why you have ranked them the way you have.

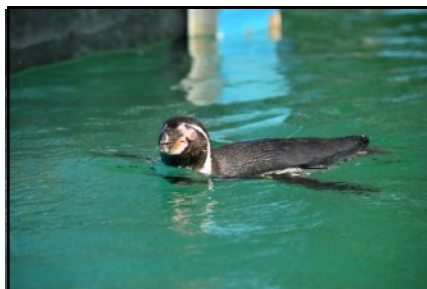

**Bactrian Camel**

Rank 1 2 3 4

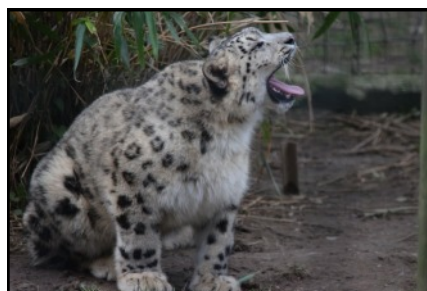

**Spider Monkey**

Rank 1 2 3 4

**Humboldt Penguin**

Rank 1 2 3 4

**Snow Leopard**

Rank 1 2 3 4

This could be extended into a classroom debate.

**Can you convince your peers that your top animal is the best adapted?**
